

MISSION

To be a sustainable MAT that cares for the environment we live in

VISION

By 2030 the Vita Trust will have halved the consumption of natural resources and consumables.

GOALS

Reduce the emissions created by the MAT straight into the atmosphere

Care for and improve our green spaces and capture back carbon

Purchase equipment and consumables from sustainable suppliers

Change our behaviours to reduce our indirect emissions

Reduce our consumption of consumables

DELIVERABLES

Install sustainable alternatives to power the school grid and heating our spaces

Plant new tree whips and other carbon absorbing plants across the schools.

Choose to work with suppliers that have a sustainable agenda

Embed new behaviours into our students and staff

Reduce and remove the use of consumables across the MAT

Cost savings and reinvestment

Insights and achievement
